### DETAILED ACTION

1. This Office Action is in response to a RCE filed by the Applicant entered on July 13, 2007.
2. Claims 2-11, 13-21 and 23-31 are allowed.

### ***Allowable Subject Matter***

3. The following is an examiner's statement of reasons for allowance: claims 2-11, 13-21 and 23-31 are considered allowable since when reading the claims in light of the specification, as per MPEP § 2111.01 and/or In re Sneed, 710 F.2d 1544, 1548, 218 USPQ 385 (Fed. Cir. 1983), none of the references of record alone or in combination disclose or suggest the combination of limitations specified in the independent claims.

The instant application discloses a level selection table that allows the user to select levels associated with the selected hierarchy of members (as defined at e.g., pg. 14, L1-25 to pg. 15, L2 4) and a member selection script that is executed after the hierarchy of members has been modified to reproduce the user's original input to the member selection interface based on the members and hierarchical relationships of the user's original actions in navigating through the hierarchy of members (as defined at e.g., pg. 3, L13-23; pg. 13, L18-32), as specified in claims 2, 13, and 23.

Weinberg et al (US Patent #6,587,969) discloses a method for testing a transactional server. The user steps taken during a user session with the transactional server are recorded by capturing and displaying screens returned

Art Unit: 2129

by the transactional server. The test is displayed as a hierarchical node structure in which the transaction steps are represented as nodes that have properties that can be edited.

Schumacker et al (US Patent #6,532,023) discloses a method for recording user interactions with the components of an applet. An applet event recorder detects events when a user interacts with the applet. The events are stored in a queue and played back at a later time.

However, the combination of Weinberg and Schumacker do not teach the combination of limitations of independent claim 2. In particular, Weinberg and Shumacker do not teach a level selection table that allows the user to select levels associated with the selected hierarchy of members, and executing the member selection script after the hierarchy of members has been modified to reproduce the user's original input to the member selection interface based on the members and hierarchical relationships of the user's original actions in navigating through the hierarchy of members.

Claims 3-11 are dependent on claim 2 and are therefore allowable.

Claims 13-21 and 23-31 recite limitations similar to that of claims 2-11 and are allowable for the same reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### **Conclusion**

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
